Training in case of two times a week allows you to take a promotion test every two months.	Black belt holders need to have degree plans for the next black belt level.	Testing items: Form, Basic Kicks, Targeting, and Board Breaking
The typical period from white to black belt is 18 months.	The period for the next level can be shortened maximally dependent on the black belt holders' effort and attendance.	For awards, attendance will be added to the testing items.
The group below 7 years old is called Kingdom Kid. The others are Kingdom Fighters.		Thus, averaged scores of form, basic kicks, targeting, board breaking, and attendance will be averaged.
